

NIGERIAN TRAINING

The AWS / Moody International Nigeria Welding Inspection Technology Training and Certified Welding Inspector (CWI) Examination Programs

The Welding Inspection Technology (WIT) Training Program

AWS certification is the welding industry's most respected sign of approval.

Moody's authoritative educational seminars are designed to prepare you for the CWI examination.

The American Welding Society, working together with Moody International have demonstrated their commitment to bring industry the best and most reliable educational and certification programs, tailored specifically for each circumstance and the needs of the job.

With practical training and practice exams, offered during the training, attendees can be confident of receiving the most specialized preparation needed to expand their knowledge base, improve their inspection skills, and work with diverse fabrication, inspection and testing codes, standards and specifications, industry-wide.

Our approach to education and training will provide an intense week of preparation that will not be found anywhere else.

The Certified Welding Inspector (CWI) Program

If every employee or contractor hired came with an objective stamp of approval, we would never need to worry about deploying under-qualified personnel again. By specifying personnel who are AWS-certified, you:

- ◆ minimize failures and recall.
- ◆ uniquely increase sales advantages over foreign and domestic competition.
- ◆ save money on training and testing.
- ◆ maximize product liability protection.
- ◆ maintain desired levels of workmanship and quality, while improving productivity and efficiency for your company.

Successful exam candidates become AWS Certified Welding Inspectors, joining an elite group, that, worldwide, share a defined level of proficiency. CWI's are entered into the AWS register of CWI's; receive a wallet card, certificate suitable for framing, and a unique stamp for identification. They are also listed in the AWS inspection trends magazine for industry reference and verification.

These days, it takes more than just experience to be successful. It takes proof. Proof of your worth and your ability.

With AWS certification, you will never worry about losing your competitive edge, since proof of active practice or re-examination is required at the time of renewal or re-certification.

And you will join thousands of welding inspectors who have gone through the program for over 25 years.

The AWS Certified Welding Inspector program is designed for welders, inspectors, technicians, and engineers. Earn the credentials you need for the opportunities you deserve.

NIGERIAN TRAINING

Information About AWS, Moody International Nigeria And The Program

About The Program

AWS and Moody International, entered into agreement in January of 2001, to jointly offer AWS' educational seminars and certified welding inspector (CWI) examinations in locations around the world.

Moody provides training to personnel employed by fabricating, construction, manufacturing and other entities around the world whose operations may benefit from employing certified welding inspectors.

Many manufacturers have clients that specify various codes and standards for construction but do not have the necessary certified personnel to perform, monitor or oversee the application of welding processes.

Using materials translated into local languages and well qualified instructors, Moody has engineered and developed a learning process unique to other organizations.

About Moody International

Together with local Nigerian investors, Moody International Nigeria Ltd. was formed in 1996 with the aim of bringing the renowned expertise of the Moody International group to Nigeria. Our primary objective is contribute to the development of Nigerian oil and gas projects and, to positively impact the local economy through training, investment, and the transfer of technology.

By working closely with the international client community, Moody has designed and implemented a comprehensive training curriculum that improves the availability of skilled labor to Nigerian projects while at the same time creating significant employment opportunities for Nigerian Nationals. This continued commitment to sustainable development and local content is a pillar of Moody's global operating strategy.

Additional information concerning Moody and its full range of services can be found on its website, www.moodyint.com.

About The American Welding Society (AWS)

AWS was founded in 1919 to advance the science, technology and application of welding as a nonprofit educational association.

AWS services over 50,000 members worldwide consisting of engineers, educators, researchers, welders, inspectors, welding foremen, company executives and officers, and sales associates.

AWS is led by a volunteer organization of officers and directors, and is composed of 22 districts with more than 160 local sections located throughout the U.S. and overseas.

Headquartered in Miami, Florida USA, it is supported by a 100-member staff.

AWS offers more than 200 books, charts, videos, replicas, proceedings, and software items. 160 AWS-developed codes, recommended practices, and guides are produced under strict American National Standards Institute (ANSI) procedures, and that includes one of the most consulted codes in the world, the d1.1 structural welding code.

AWS' certified welding inspector program has been in effect for over 25 years and, to date, more than 36,000 professionals have been certified.

Additional information concerning AWS can be found on its website, www.AWS.org.
